Python Assignment 3

While loop , for loop , and functions

Project Title

Python Programs Using Loops and Functions

Objective

To understand and practice python concepts such as while loop , for loops , conditional statements , control statements , and user defined functions .

Programs :

Program 1 : number guessing game

Generate a random number , give the user 3 attempts , check the users guess , display the result

Program 2: multiplication table

Get the number from the user , use a for loop , display the multiplication table from 1 to 10 .

Program 3 : bmi calculator

Get weight & height from the user , calculate bmi using a function , display the bmi result

Conclusion

I successfully complete all 3 programs and learned how to use loops and functions in python
